NEWS RELEASE:

## ITT Completes Design Milestone on B-1B Electronic Warfare system upgrade

**PARIS, June 17, 2009** - ITT Corporation (NYSE:ITT) recently completed the System Functional Review to an upgrade for the U.S. Air Force B-1B's major self-protection system.

The upgrade of the 20-year old technology will improve reliability and maintainability. The redesign incorporates new technology, as well as a redesign of test and support equipment., for the Band 4-8 Receiver Line Replacement Unit(LRU) in the AN/ALQ-161, the major protection system for the United States Air Force's B-1B Bomber.

"With this second of five check points completed, we remain committed to bringing this critical technology to one of our most important fighter aircraft," said ITT Electronic Systems President Chris Bernhardt.

The review ensures that the design requirements are addressed by the system. Program and technical experts from Robins Air Logistics Center, Warner Robins, Ga., reviewed and approved the concept designs. The next development step for ITT is the preliminary design phase, which culminates in a formal Preliminary Design Review currently planned for the late 2009.

ITT Electronic Systems is one of the world's leading suppliers of electronic warfare technology for mission success and survivability. Key technologies include integrated EW systems for self-protection, reconnaissance and surveillance, force protection, mine defense, naval command/sonar applications, and submarine communication and tracking. In addition, Electronic Systems produces aircraft armament suspension/release equipment; electronic weapons interface systems, and advanced composite structures and subsystems, as well as Gilfillan precision landing and air traffic systems.

### **About ITT Corporation**

ITT Corporation is a high-technology engineering and manufacturing company operating on all seven continents in three vital markets: water and fluids management, global defense and security, and motion and flow control. With a heritage of innovation, ITT partners with its customers to deliver extraordinary solutions that create more livable environments, provide protection and safety and connect our world. Headquartered in White Plains, N.Y., the company generated 2008 sales of \$11.7 billion. [www.itt.com](http://www.itt.com)
